OCTO N. OGDEN,

## VICE PRESIDENT'S REPORT.

---

NEW ORLEANS, January 17, 1880.

*To the General Assembly of the State of Louisiana :*

GENTLEMEN—I have the honor to hand you herewith detailed reports of the officers of the Charity Hospital for the year 1879, viz: of Dr. Geo. K. Pratt, Surgeon in charge; of the Treasurer, F. R. Southmayd; and of the Committee of Improvements from Board of Administrators, Messrs. Lagan and Jurey.

I take great pleasure in stating that all the officers of the Hospital have discharged their duties faithfully, and that the Sister in charge has displayed her usual zeal and efficiency in controlling and directing the internal affairs of the institution.

Respectfully submitted,

On behalf of Board of Administrators,

A. C. HOLT, M. D.

Vice President.

## ANNUAL REPORT.

---

*Dr. A. C. Holt, Vice-President Board of Administrators, Charity Hospital :*

SIR—In presenting this, our report, at the close of the year, as it is also the closing of that administration which put us in charge of this noble charity, it is fitting that we should refer to the condition in which we found this trust when first we assumed it.

On first entering upon the discharge of our duties, the desolation and want everywhere apparent was appalling. Beds and bedding, provisions, drugs, and necessaries for the patients were sadly deficient, or totally exhausted, the beds not having a change of sheeting, and scarcely any winter covering, the supply of drugs and provisions being totally exhausted, while the credit of the Hospital was gone, and could not be used for the purchase of a pound of flour or salt.

The buildings, too, we found in a most dilapidated condition, the floors, walls and roofs being unsafe. In places, the walls and roofing had already succumbed to the neglect of repairs; other portions were threatening and in danger of falling in; the galleries of some of the buildings were fast receding from the walls; the stairs and landings were nearly impassable, and the supply of water (that most necessary element in a hospital), was very limited. Under such unfortunate conditions, commenced our duties.

Finding that it would be impossible to enter upon general repairs, until we had taken measures to prevent the falling of walls and galleries, we set at once to work, to render these secure

by clamps and bolts, and having succeeded in so doing, proceeded in the work of thoroughly repairing and putting in order the several buildings. In several instances we were compelled to renew portions of the foundations of brick buildings, before we could properly carry on the work of repairing them.

Without specifying in detail all that has been done, we give the major part of the work of repairs accomplished, as follows:

We have had hot and cold water distributed throughout all the wards. A new boiler has been put up, and the old one has been repaired and put in thorough working order, and new foundations put under all the machinery.

New wood working machinery, for manufacturing articles necessary to repairs, has been set up, and the same has already saved many times its cost. Two new brick water closets have been built, (the old ones, so offensive, and detrimental to the general health of the hospital, having been demolished). One new lying in division has been built, and the building set apart as the women's department, thoroughly repaired; new galleries (open and enclosed) put up, and the whole building thoroughly ventilated between the floors and ceiling, making a vast improvement in its sanitary conditions; new venitian blinds have been put to all the windows throughout the Hospital. Steam radiators put in all the women's wards. The roofs throughout have been all repaired. A new dining-room for female employees, erected, and three new sheds and a brick store-room built; seventeen new cisterns put up, capable of containing two hundred and forty thousand gallons of water. Water mains have been laid, and forty-eight hydrants established on the grounds. The grounds have been thoroughly graded and relaid, affording perfect drainage. The main building thoroughly repainted within and without, and the other buildings more than once.

Two hundred new black walnut bedsteads have replaced that number of broken and worn out old ones. New beds and bedding,

an ample supply furnished; an elevator has been put in the main building, and the Hospital connected by telephone with the telephonic wires throughout the city.

Besides these, the Surgical and Microscopic Departments have been fitted with new apparatus and instruments, and we can now say, that in all its departments, the Charity Hospital is to-day better appointed and more thoroughly fitted and furnished than at any other time in its history.

The money thus spent, has been well spent; and as a matter of interest, we take from the Treasurer's book, the sum total of the various accounts, which show the amount expended in building, repairing, improving, refitting and refurnishing the Hospital during the present administration :

Repairs and house furnishing.....	\$69,534 84
Surgical case .....	1,245 69
Microscopes .....	449 25
Elevator .....	300 00
Telephone (yearly).....	75 00
<hr/>	
Total.....	\$71,604 78

In closing our report we are happy to state there are sufficient funds on hand to pay for new work and repairs now being made, when finished, although certain works which we have not entered upon are yet very necessary—say, new floors throughout the halls and wards in the lower story of main building, ventilation and heating throughout the same, and improved applications for the surgical wards. Thus, at the expiration of our term, we do not owe one cent for all the necessities, wants and repairs required for the institution since it came under our control; everything has been paid for in cash at the end of each month, and the Hospital buys in open market its supplies, etc., on as favorable terms as the best cash paying firm in the State.

To complete and carry out the repairs, heating, etc., men-

tioned above would require about eighteen thousand dollars; it would place the buildings, etc., in such good condition that, for years thereafter, no other appropriation need be asked for; and when it is considered that, although the appropriations were about one-half of those of our predecessors, we congratulate the Board on the fact that such good results have accrued.

Respectfully submitted,

L. C. JURY,

M. D. LAGAN,

Committee.

## TREASURER'S REPORT.

---

CHARITY HOSPITAL,

NEW ORLEANS, January 10, 1880.

*To the Board of Administrators of the Charity Hospital:*

GENTLEMEN—Herewith I have the honor to lay before you a complete statement of the cash receipts and expenditures of your administration for the year 1879.

I take pleasure in mentioning that through the assistance at times when it was needed, of our bank of deposit (the Citizens' Bank), Mr. Chas. T. Howard, and the Hon. E. A. Burke, State Treasurer, the Hospital has been saved very heavy discounts, which would have been unavoidable had you been compelled to make sale of State Warrants at times when your cash appropriations were exhausted.

Respectfully,

F. R. SOUTHMAYD,

Treasurer.

## TREASURER IN ACCOUNT CURRENT WITH

	DR.
To cash balance with Sister Agnes, December 31st, 1878.....	\$ 78 67

	White	Colored	White	Colored	Cured	Improved	Stationary	Aggravated	White	Colored	
<i>Diseases of the Genito-Urinary Organs, Continued.</i>											
Varicocele .....			1		1						
Prostate, enlargement of .....			3			3					
Prostatitis (gonorrhœal or- chitis) .....			1			1					
Spermatorrhœa .....			1			1					
Spermatorrhœa (impotency) .....			1			1					
<i>Venereal Diseases.</i>											
Gonorrhœa .....			17	2	8	8	3				
Gonorrhœa (bubo) .....			1		1						
Gonorrhœa (phimosis and balanitis) .....			2		2						
Gonorrhœa (chancre and bubo) .....			1			1					
Gonorrhœa (phimosis) .....			1			1					
Gonorrhœa (phimosis, chan- croid and bubo) .....			1	1	1	1					
Gonorrhœa (orchitis) .....			5			1	4				
Gonorrhœa (perineal abscess) .....			1		1						
Gonorrhœa (intermittent fever) .....			2		2						
Gleet .....			1		1						
Gleet (orchitis) .....			1			1					
Chancre .....			4	8	1	5	1				
Chancre (bubo) .....			1		1						
Chancre (gonorrhœa) .....			1				1				
Chancre (secondary syphilis) .....			1				1				
Chancroid .....	4	2	25	6	8	17	6				
Chancroid (phagedenic) .....			7	4	2	9					
Chancroid (bubo) .....	3	3	15	2	5	11	1				
Chancroid (syphilitic bubo) .....			1			1					
Chancroid (buboës) .....				1		1					
Chancroid (suppurating bubo) .....			10	1	2	6	3				
Chancroid (phimosis) .....			10	1		10	1				
Chancroid (phimosis, circum- cision) .....		5		3	3	2	4				
Chancroid (gonorrhœa) .....				6		2	3				
Chancroid (vaginitis) .....				1			1				
Bubo .....			7	1	1	5	2				
Bubo, suppurating .....		7		13	1	4	7	1			
Bubo, non-suppurating .....				2		1	1				
Bubo, syphilitic .....				4		1	3				
Bubo, indurated .....				2		1	1				
Bubo, phagedenic .....				1			1				

TABLE No. 5—Continued.

Nomenclature.	Patients Re: sining.		Patients Discharged.						Patients Died.		
	White	Colored	White	Colored	Cured	Improved	Stationary	Aggravated	White	Colored	
<i>Diseases of the Genito-Urinary Organs, Continued.</i>											
Diabetes, mellitus.....	1										
Gravel .....			1								
Urine, incontinence of.....	1		3		1	1	1				
Urine, retention of.....	1	1	2		1	1					
Oxaluria .....			1								
Irritation of neck of bladder.....			1			1					
Addison's disease.....	1		1			1					
Cystitis.....			2	1	1	2					
Cystitis, chronic.....			3			3					
Cystitis, gonorrhœal.....			1			1					
Cystitis, suppurative.....			1			1					
Cystocele.....			1								
Stricture of urethra.....	4		30	7	5	26	6				
Stricture of urethra, (internal urethrotomy).....			2			2					
Stricture of urethra, sloughing of penis, (external urethrotomy).....			1		1						
Stricture of urethra, perinenal fistulas (perineal section).....			3	1	2	2					
Stricture of urethra (perineal section).....					1	1					
Stricture of urethra (urinary fistula).....			1								
Stricture of urethra (hydro- cele).....			1		1						
Stricture of urethra (gravel in bladder).....			1			1					
Phimosis .....	1										
Phimosis (operation) .....			2			2					
Paraphimosis .....	4	1	3		2						
Paraphimosis (sloughing).....	3		2		1						
Epididymitis .....	1					1					
Epididymitis, gonorrhœal.....	1					1					
Orchitis .....	2		2								
Orchitis, gonorrhœal.....	1		4	1		5					
Orchitis, scrofulous.....			2			2					
Orchitis, chronic.....			2			2					
Orchitis (hydrocele).....			1			1					
Orchitis (epididymitis).....			1			1					
Orchitis, double.....			1	1		2					
Urinary fistula.....			1			1					
Hydrocele .....	1	1	5		5						1
Hydrocele, double.....					1	1
